DETAILED ACTION

Response to Arguments

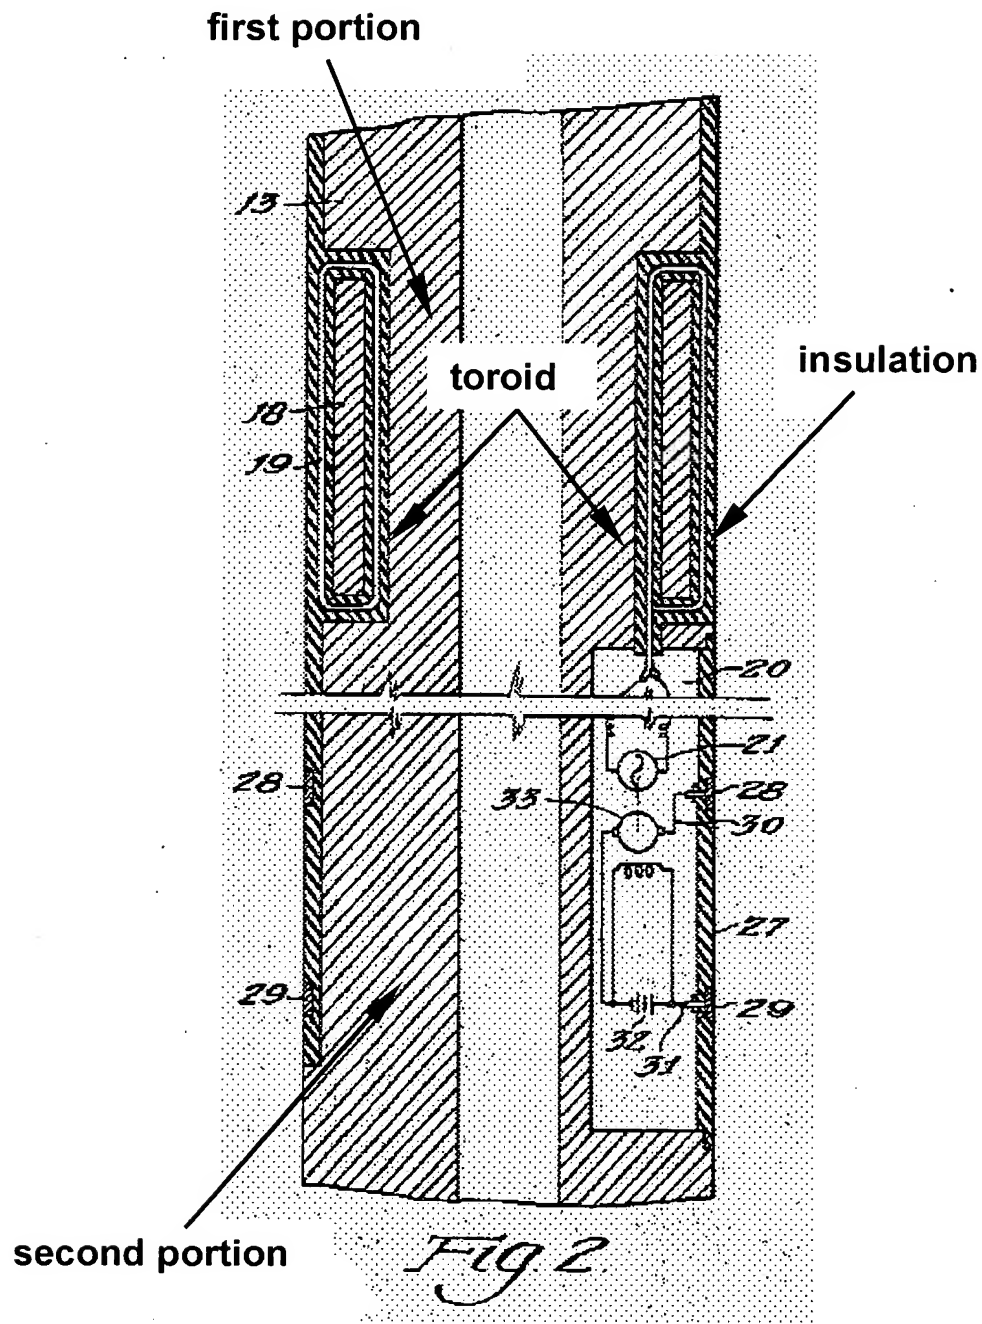

1. Applicant's arguments, see pages 8-10 and 12, filed 11 April 2005, with respect to independent claims 1 and 7 have been fully considered and are persuasive. The previous of rejection of the claims has been withdrawn.

Allowable Subject Matter

2. Claims 1-7, 9 and 10 are allowed over the Prior Art of record.

3. The following is an examiner's statement of reasons for allowance: The primary reason for allowance of the independent claims 1 and 7 is the inclusion of the specific limitation of a measurement system comprising a metallic section in direct contact (i.e. electrical) with a drill string having at least one of a drilling means for drilling a subterranean borehole or a pullback means for pulling an object through a subterranean borehole and further including at least one toroid with a non-conductive material disposed therearound. The "direct contact" allows for the drill string itself to transmit signals, which the Prior Art fails to disclose with the associated claimed elements. The closest reasonable Prior Art reference is US 2,354,887 to Silverman et al. which disclose a drill string having drilling means to drill a borehole (see Fig. 2 below) having a toroid and a measurement system, however, there is no "direct contact" between the measurement system and the drill string.
